MEDICAL TREATMENT IN THAILAND

The following list of local area hospitals is for the Northeast, Central, and Southern regions of Thailand. Many of the hospitals on the list are staffed by doctors with a reasonable command of English who are familiar with American medical care. In many cases, doctors have received training in the U.S. or other western countries. Hospitals outside of Bangkok may not be able to offer a wide range of English services. Please note, this list is not meant to be exhaustive or definitive, nor does it represent any guarantees of competence by the Department of State or the American Embassy.

Hospitals are separated by location, with the largest number of facilities located in Bangkok. A list of medical facilities in northern Thailand may be found [here](#).

Vaccine information: The Bang Rak Vaccination and Health Center, the Institute of Dermatology, and the Bamrasnaradura Infectious Diseases Institute (information below) are currently providing free bivalent vaccines to non-Thai citizens on a walk-in basis. You can also visit the FDA’s website to [learn more about FDA-approved vaccines](#) in the United States.

BANGKOK
